## **Introduction**

The Wastewater Infrastructure Funding (WIF) program is a gap-financing tool used in conjunction with the Clean Water Revolving Fund and the U.S. Department of Agriculture's (USDA) Rural Development grant and loan program. The WIF program provides supplemental assistance to high priority municipal wastewater projects with high cost needs. The program is established in Minnesota Statutes Section 446A.072 and is administered by the Minnesota Public Facilities Authority (PFA). To access the program, municipalities must have their projects listed on the Minnesota Pollution Control Agency's (MPCA's) Project Priority List (PPL), and must apply for funding either to the PFA through the Clean Water Revolving Fund (CWRP) application process or to USDA Rural Development through their grant and loan application process.

## **Current WIF Program Funding Criteria**

WIF funds are awarded to projects based on their priority ranking on the MPCA's PPL and the eligibility criteria established under Minnesota Statutes 446A.072. Small rural communities with median household incomes below the non-metro state average (2000 Census: \$38,004) may apply for funding to USDA Rural Development. Projects that receive a USDA Rural Development grant based on their funding criteria may receive a WIF matching grant for up to 65% of the grant eligible amount determined by USDA Rural Development. This state-federal partnership makes it easier for small communities to access funding, reduces state administrative expenses, and helps USDA Rural Development fully utilize the loan funds allotted to Minnesota.

Currently, a project that does not receive funding from USDA Rural Development may receive WIF assistance in the form of a zero interest loan for the eligible project costs that exceed 5% of the taxable market value of properties in the project area. The eligible project cost is determined by multiplying the total project cost by the Essential Project Component percentage calculated by the PCA, which represents that portion of the project needed to meet existing needs. A WIF loan must be combined with a CWRP loan, for a combined term up to 40 years. Payments on a WIF loan are deferred for the first 20 years while the CWRP loan is repaid.

## **WIF Program Funding Status**

The table on the following page shows the current funding status of the WIF program. Net project appropriations under the program are shown in three categories: 1) funds appropriated for the general WIF program and awarded based on the program criteria (Minnesota Statutes Section 446A.072); 2) funds appropriated in 2005, 2006 and 2008 for corrective action projects under MN Laws 2005 Chapter 20, Article 1, Section 23, Subdivision 3(b), and MN Laws 2006 Chapter 258, Section 21, Subdivision 3(b)); and 3) special appropriations for specific projects. A remaining balance of \$798,099 is currently available for new projects under the general WIF program. The remaining special appropriation balance of \$150,000 was appropriated for a Bayport storm sewer project. The funds are not needed to complete that project and the PFA has recommended cancelling that appropriation.

**WIF Funding Status as of January 21, 2010**

	General WIF Program	Corrective Action	Special Appropriations
Net project appropriations, FY 1995 to 2008	130,535,249	10,776,672	19,250,000
Awarded to date	122,369,444	9,576,672	19,100,000
Unencumbered Balance	8,165,805	1,200,000	150,000
Reserved for projects meeting program requirements *			
BLOMKEST/SVEA	1,054,000		
ESSIG	75,000		
LAFAYETTE	364,650		
LOWRY	1,000,000		
MCGRATH		1,200,000	
MIDDLE RIVER	136,785		
MIDWAY TWP - ST LOUIS CTY	127,215		
MOOSE LAKE - PHASE 2	422,641		
QUAMBA	615,000		
RENVILLE	3,572,415		
Subtotal - WIF Funds Reserved	7,367,706	1,200,000	-
Available For New Projects	798,099	-	150,000

\* Under the WIF program statutes (Minnesota Statutes, Section 446A.072, subdivision 3(d), funds are reserved for projects when the applicant receives a funding commitment from USDA Rural Development or submit plans and specifications to the MPCA.

**Proposed WIF Program Changes**

The PFA recommends a change to the WIF program for projects where WIF is provided in conjunction with a CWRP loan (rather than as a match to USDA Rural Development funding). The proposed change is to modify the program and funding criteria to provide WIF assistance as a grant based on system costs over 1.4% of median household income (MHI) rather than as a deferred loan for projects costs that exceed 5% of market value. This is the way the program worked prior to 2002, when the deferred loan approach was adopted due to concerns about the growing number of large and expensive unsewered area projects ranked high on the Project Priority List, many in rapidly developing lakeshore areas where property value was a better indicator of affordability than MHI.

In 2006, with support from the PFA, the MPCA amended their rules for ranking and reviewing projects. These rule changes emphasized small decentralized systems to address problems in unsewered areas rather than creating new large and expensive centralized systems. With these changes by MPCA, it is appropriate to change the WIF program back to a grant based on system costs as a percent of MHI, which will better target WIF funds to address the affordability problems many cities face as they make needed improvements to their existing wastewater systems.

The proposed changes to the funding criteria will consider total system costs including both debt service and operation and maintenance costs. The grant amount will be 80% of the system costs over 1.4% of MHI to maintain an incentive for the cities and consultants to control project costs. This is the same criteria established in state law in 2009 for supplemental grants made from the federal ARRA funds. Eligible project costs are determined using an essential project component percentage calculated by PCA to focus WIF assistance on costs to address existing environmental and public health problems versus growth related needs. The maximum WIF grant is \$4 million, and the PFA recommends removing the existing provision which raises the maximum WIF amount for multi-municipal projects. This change would also apply to WIF grants to match Rural Development.

### **Estimated WIF Needs**

The table on the pages 7-18 identifies estimated WIF funding needs for projects on the MPCA's 2010 Project Priority List. The table shows estimated WIF amounts under the current program and under the proposed program changes as described above.

The estimated WIF amounts are based on preliminary project information from the municipalities and other information compiled by the PFA. In November 2009 the PFA surveyed all municipalities with projects on the 2010 PPL and we received updated information on 150 of the 381 projects. In most cases this information is still considered preliminary and has not been verified. Therefore, the WIF amounts shown in the table are estimates and are subject to change.

At the current 45 point funding cutoff on the 2010 Intended Use Plan for Clean Water Revolving Fund loans, projected WIF needs based on the proposed changes total \$94.4 million, approximately \$840,000 more than the current program. It is important to note that projects often spend 2-3 years or more in the planning and design stages, and the PFA generally expects 50% or less to proceed to construction in any given year.

As a result of language in the 2010 federal appropriation for the Clean Water Revolving Fund, the PFA will receive approximately \$5.6 million in federal funds that must be provided as principal forgiveness (grants). The proposed program changes will allow the WIF grant criteria to be used for these federal funds as well, allowing the state and federal funds to be used interchangeably to meet the WIF needs.

\* Projected WIF needs based on proposed change to WIF program to provide grants for 80% of eligible costs over 1.4% of MHI up to \$4 million. Estimated WIF amounts are based on preliminary project information from the municipalities and other information compiled by PFA. In most cases detailed funding applications have not been submitted and data has not been verified.
